

MAURICIO RAUL FERREYRA

Full Stack Developer

NATIONALITY: argentinian EMAIL: mauriciotauro82@gmail.com

CITY: Rosario TEL.: 341-6-663403

LINKEDIN: <https://www.linkedin.com/in/mauricio0789/>

GITHUB: <https://github.com/MauricioRaulFerreira>

I am currently finding my first IT job, thanks to my experience in previous jobs, I perform very well in a team, always improving solutions to reduce response times to problems that arise in projects, considering that time is important in their development.

I have participated in No-Country, where work environments are emulated to gain experience and improve technical capacity, and soft skills.

FULL STACK WEB DEVELOPER - BOOTCAMP HENRY - October 2021 - April 2022

Acquired Knowledge : Html, Css, JavaScript, React Hooks, Redux, Node, Express, Sequelize y Database PostgreSQL.

FULL STACK WEB DEVELOPER - CODERHOUSE - January 2021 - February 2022

Web Development: <https://www.coderhouse.com/certificados/606f019234d0eb0096c80c58>

* Layout : HTML5, CSS3 y Responsive Design Mobile

JavaScript : <https://www.coderhouse.com/certificados/60cdf96efb8df80011e75881>

* Programmation logic , variables , JSON , Storage , DOM

ReactJS : <https://www.coderhouse.com/certificados/6150a4de2759f30064eba3b3>

* JSX , Routing , Navigation , async, promises ,Context

Back-End : <https://www.coderhouse.com/certificados/6239ecf4d09090001927b7cc>

* NodeJS , Express , Postman , Motores de Plantillas ,Websocket , GIT , MongoDB

LANGUAGES:

* English : level B1.

PORTFOLIO - PROJECTS

* App : for the purchase of flight tickets

Development of a SPA, using React for the FrontEnd and Redux, Redux Persist as statemanagement. The styles of the components were made with pure CSS, libraries like Bootstrap, MUI. For the BackEnd, NodeJs with Express and Sequelize were used to create the database with PostgreSQL.

Some features of the project: filters and searches, to find flight tickets, from a city of origin, to a destination city, both one-way and round-trip, and to be able to view all the ticket information, such as price, intermediate stops, equipment etc

Login, logout and registration in the app, to later be able to make a secure purchase.

Payments can be made by credit card, using Stripe technology.

Chat to request information such as payment methods, offer destinations and recommendations.

The app can be viewed in Spanish and English, as desired by the user.
